Education

Manipal University Jaipur — Jaipur, Rajasthan
Bachelor of Technology in Computer Science and Engineering — *Aug. 2025 – Present*

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, HTML5/CSS3, SQL, Java
Backend: Node.js, Express, Prisma ORM, JWT Authentication, OAuth, Zod, REST API Design
Frontend: React, Next.js, Tailwind CSS
Databases & Caching: PostgreSQL, Supabase
Infrastructure & Tools: Docker, Git, GitHub Actions, Google Cloud Platform, Microsoft Azure, VS Code
Practices: Sprint-based development, adversarial/smoke testing, service-layer architecture, API-first design

Projects

CodeVault | *Self-hosted code snippet manager* — Live Demo | GitHub

- Built a full-stack snippet platform with Next.js, Express.js, PostgreSQL, and Prisma, implementing JWT authentication, ownership enforcement, search/filtering, profiles, visibility controls, analytics, syntax-highlighted views, and fork lineage tracking.
- Identified and fixed an inverted visibility check through adversarial security testing that could have allowed users to fork private snippets they did not own; added Google/GitHub OAuth, Gemini-powered code explanations with graceful fallback, Dockerized local deployment, and documented smoke tests.

PostgreSQL Query Advisor | *In progress*

- Started exploring PostgreSQL query performance diagnostics using `pg_stat_statements` and `EXPLAIN` plans, with a focus on query statistics, costly execution patterns and rule-based diagnostic ideas.

Aether Realm | *Interactive 3D developer portfolio* — Live Demo | GitHub

- Built an RPG-inspired interactive 3D portfolio using Next.js, React Three Fiber, Three.js, and TypeScript, replacing a conventional portfolio with an explorable game-like environment.
- Implemented custom character movement, orthographic camera behavior, interactive portfolio zones, dialogue panels, proximity triggers, and persistent progression using Zustand.

Code-e-Manipal 2.0 | *Hackathon management platform* — Live Platform

- Developed a full-stack hackathon platform using Next.js, React, TypeScript, and Tailwind CSS with Supabase authentication/management, Azure PostgreSQL, and pgAdmin.
- Implemented role-based participant and administrative workflows for registration, submissions, and event management with reusable responsive interfaces.

Experience

IEEE Computer Society MUJ — Jaipur, Rajasthan
Senior Coordinator, Technical Projects — *May 2026 – Present*

- Designed and built an interactive web-based puzzle case file for CASCADE, IEEE CS MUJ's flagship online event, from concept through deployment.
- Coordinate technical contributors and project timelines; designed and deployed Operation Deadlight, an animated, puzzle-driven cryptic-hunt website for CASCADE and other major IEEE CS MUJ initiatives, including Genesis 6.0

Technical Team — Junior Committee — *Jan 2026 – Apr 2026*

- Contributed to technical projects and event execution as part of the Technical Projects team, building the foundation for promotion to Senior Coordinator.

LearnIT Club, MUJ — Jaipur, Rajasthan
Senior Coordinator, Web Development — *May 2026 – Present*

- Lead web development coordination and contributor workflows for the Code-e-Manipal hackathon platform using Next.js, TypeScript, Supabase, and PostgreSQL.

Web Development Junior Working Team — *Oct 2025 – May 2026*

- Developed the Resources platform for the LearnIT website, organizing curated technical learning materials for student developers.
